

## **LPP4513 Versatile Tabletop Multi-Laminator**

### **This extremely versatile Multi-Laminator can do it all! Perfect for printers needing various laminating capabilities:**

- One Side Laminating – System has built-in decurler to produce flat sheets. Built-in perforator wheel weakens the edge of the lamination for easy hand sheet separation.
- Two Side Laminating – Film thicknesses from 1.2 mil through 5 mil.
- Mounting – Roller pressure gaps to allow insertion of foam boards for mounting as well as simultaneous mounting and laminating for signs, trade show displays, etc.

## **Key Features**

One side laminating with built-in decurler and easy hand sheet separation

Two side Laminating 1.2 to 5 mil films

Mounting capabilities to foam board

Foot pedal web advance included

Easy Set Temperature dial, ready light when set temperature is achieved

Optional liner rewinder available for use of PSA (cold) films

Energy saving standby mode

Heated rollers for scratch free laminations

**Maximum Laminating Width** 18"

**Laminating film thickness** 1.2 mil – 10 mil

**Mandrel Core Size** 1"and 3" cores

**Speed** Variable up to 10 feet per minute

**Gross Weight** 65lbs

**Power Requirements** Standard 120 volt power
